### About The Prince Edward County Memorial Hospital Foundation

The Prince Edward County Memorial Hospital Foundation is the voice and the champion of quality health care for the County.

The population of the County is growing faster and curiously, older than many parts of the Province. Prince Edward County is quickly becoming home to people from all over the country. Many are drawn here by the lifestyle but for others the decision is driven by the quality of local health care.

Prince Edward County Memorial Hospital is the focal point of the local health care system. Thousands of County residents and visitors depend on the PECMH for their care and for their connection to QHC and the provincial health system.

There has been a prolonged period of uncertainty about health care in the Prince Edward County community. Changes in health care leadership coupled with perceived threats to the health care resources in the County have made it difficult for the Foundation to focus on its mission.

These issues have been addressed and the new plan for the redevelopment of the PECMH is in the works.

**Donor Recognition** The Prince Edward County Memorial Hospital Foundation is in the process of establishing a new donor recognition program and policy to recognize individuals, corporations, service clubs, community organizations and philanthropic foundations who make monetary donations to the redevelopment of Our Hospital.

**Contributors** will be recognized through many donor levels, and can progress from one category to the next as their gifts accumulate.

Please enjoy the show and thank you so much for helping our hospital.

~ The PECMHF Team
